

# Recombinant SARS Spike RBD (His&Avi Tag)

Cat. No. bs-46008P

## Description

<b>Protein Sequence</b>	SARS Spike RBD with a His tag and Avi at the C-terminal (Arg306-Phe527).
<b>Source</b>	Mammalian Expression System
<b>Accession</b>	P59594
<b>Mol wt</b>	The protein has a predicted MW of 27.9 kDa. Due to glycosylation, the protein migrates to 36-46KDa based on Bis-Tris PAGE result.
<b>Endotoxin</b>	Less than 1EU per ug by the LAL method.
<b>Purity</b>	> 95% as determined by Bis-Tris PAGE
<b>Activity assay</b>	Not tested.

## Formulation and Storage

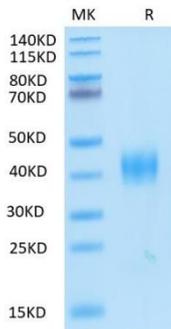

<b>Formulation</b>	Lyophilized powder (Lyophilized from 0.22um filtered solution in 20mM PB (pH 7.4). Normally 5% trehalose is added as protectant before lyophilization..)
<b>Storage</b>	The product should be stored at -70°C or -20°C.

## Background

The spike protein (S) of coronavirus (CoV) attaches the virus to its cellular receptor, angiotensin-converting enzyme 2 (ACE2). A defined receptor-binding domain (RBD) on S mediates this interaction. The S protein plays key parts in the induction of neutralizing-antibody and T-cell responses, as well as protective immunity.

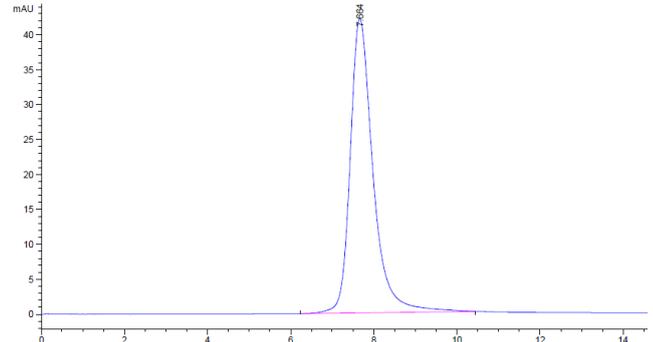

## Assay Data

### Tris-Bis PAGE

Recombinant SARS Spike RBD on Tris-Bis PAGE under reduced condition. The purity is greater than 95%.

### HPLC Data

The purity of SARS Spike RBD is greater than 95% as determined by SEC-HPLC.
